

Water and Waste Tanks Available Now with No Tooling Cost.

At Myers, we know that parts that require a tooling investment may not be the right solution to your business. That's why we have developed a comprehensive line of linear low density polyethylene (LLDPE) water and waste tanks with the fitting locations customized to your needs. They're ready to run now and enable you to have a solution tailored to your needs while saving time and avoiding a tooling investment.

How to Get Your Quote

- Select your tank size from the list
- Choose number of fittings
- Submit your request to waterwastetanks@myersind.com

Water Tanks

All tanks are manufactured from FDA approved resin, fully comply with FDA regulation 21 CFR 177.1520, and meet US Coast Guard regulations. These tanks may be used for storing potable water. All water tanks are natural LLDPE, available in standard wall thickness or heavy-duty.

Waste Tanks

Our waste tanks can be used for holding black water and grey water. In addition, all waste tanks meet the material and pressure specifications for sanitation tanks as called out in federal regulation 33 CFR 159. Our waste tanks are only available in black LLDPE and heavy-duty wall for added safety and odor control.

Myers offers three solutions to meet your water and waste tank needs.

- Blank Tanks - Ready for delivery
- Semi-Custom - Avoid tooling costs. Pick any of our standard tanks then select your fitting size, quantity and location
- Full Custom - Tanks and fittings for your unique design
- Produced and shipped from our Decatur, GA facility

Specification Chart

Tanks	Gallons *	Length	Width	Height	Water Tank	WasteTank**
					Standard Wall	Heavy Duty
